

**2018**

**CRIME AND CALLS FOR SERVICE STATISTICS**

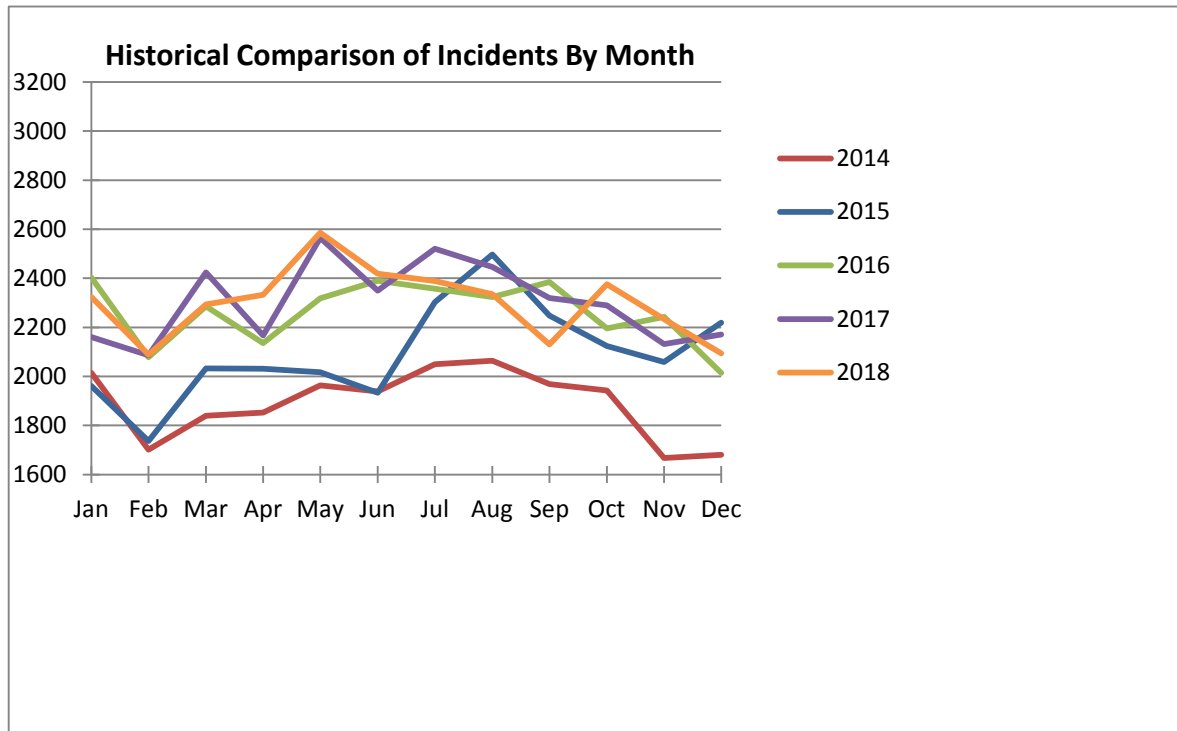

**ADDISON POLICE  
DEPARTMENT**

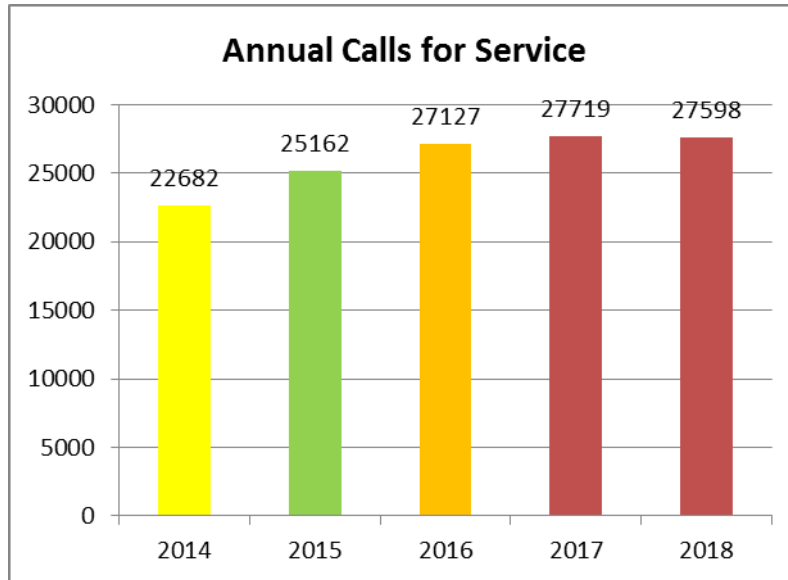

**Prepared by:  
Records Director Mike Tierney**

# STATISTICS

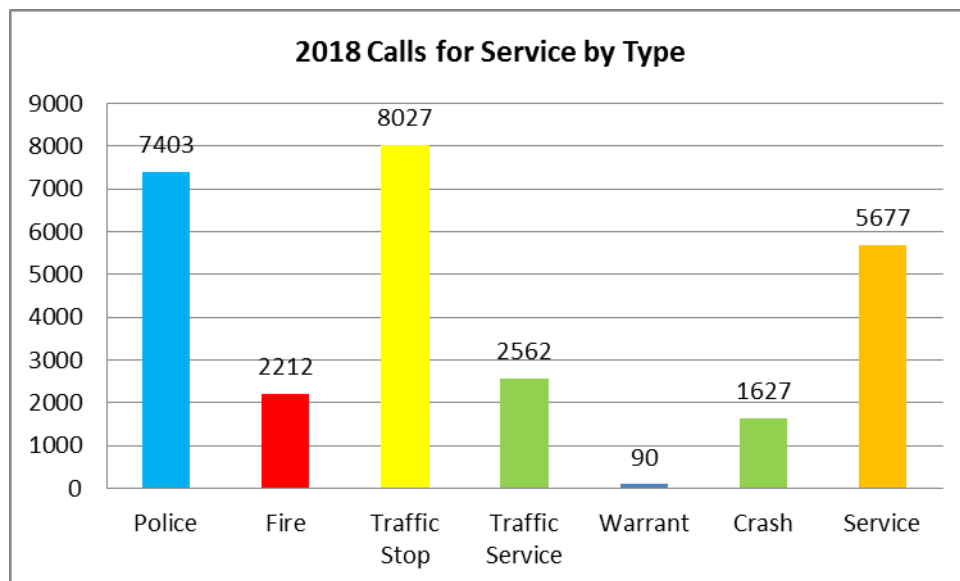

Twenty graphs have been included in this report to show statistics for various types of Police Department activity occurring throughout the year. Following is a brief description of each graph included in this report:

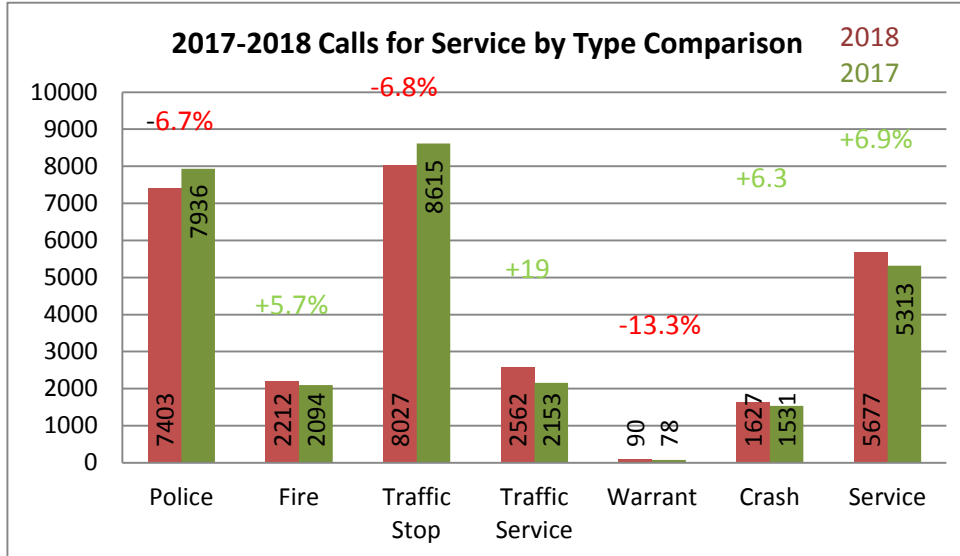

**Incidents By Month** - These graphs show comparisons for the last five years of all calls for service by month. Monthly calls for service statistics increased as compared to previous years in general; however, there was more activity than usual in all the months except August and December. The total calls for service in 2018 were 27,598. This was a very slight decrease from 2017.

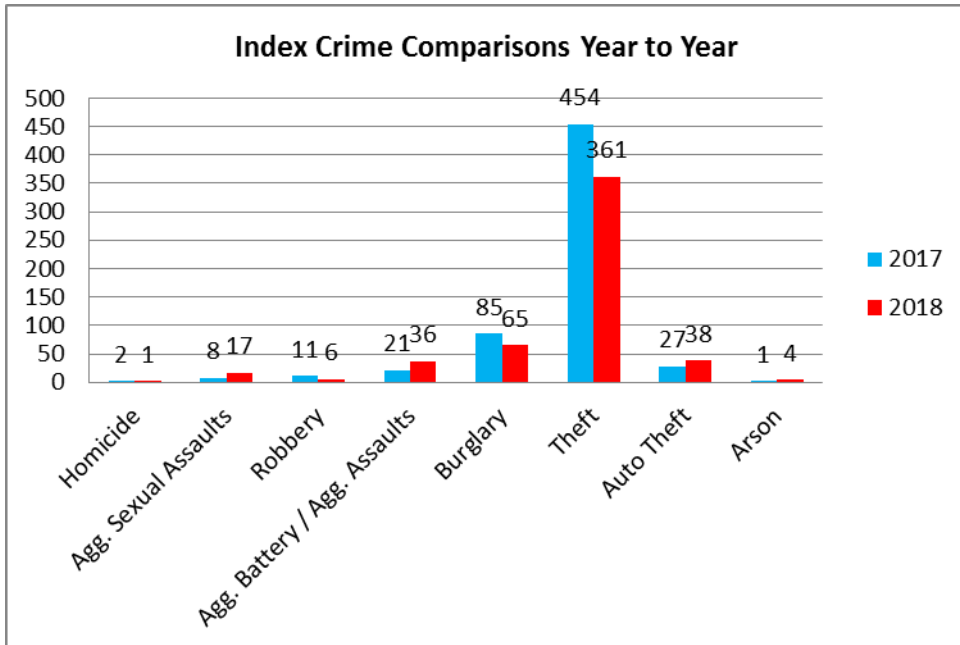

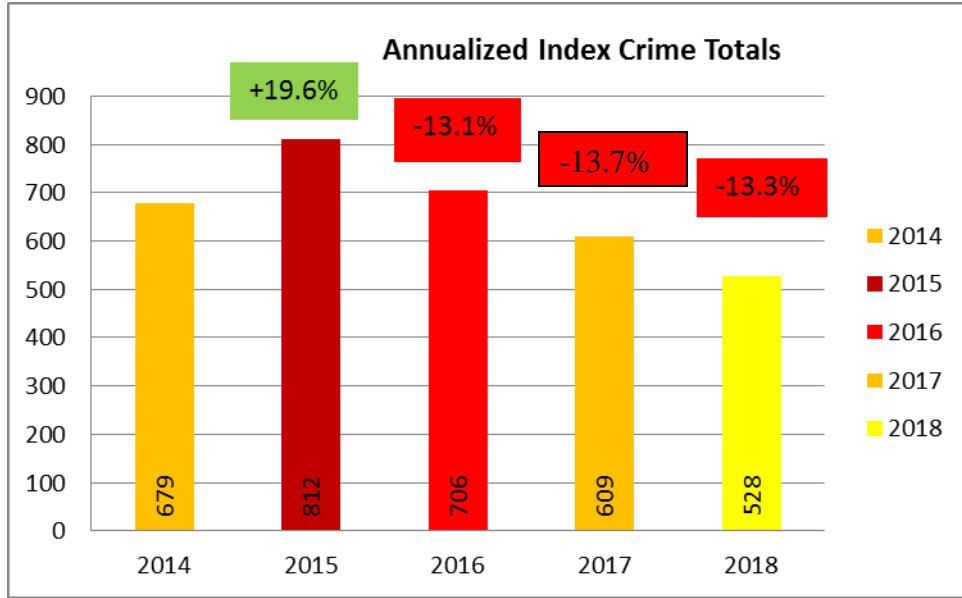

***Calls for Service by Type*** - These graphs show comparisons for the last two years of all calls for service by type. The total number of calls for service was lower in 2018 by 0.4% over 2017. The largest percentage increase was in Traffic Services (Motorist Assists, Abandoned Autos, Signal Issues) which was 19% higher than 2017. There was a 6.3% increase in the number of Traffic Crashes over 2017. In contrast, there was a 6.7% decrease in Police Calls for Service, 6.8% decrease in Traffic Stops, and 13.3% decrease in Warrant Services.

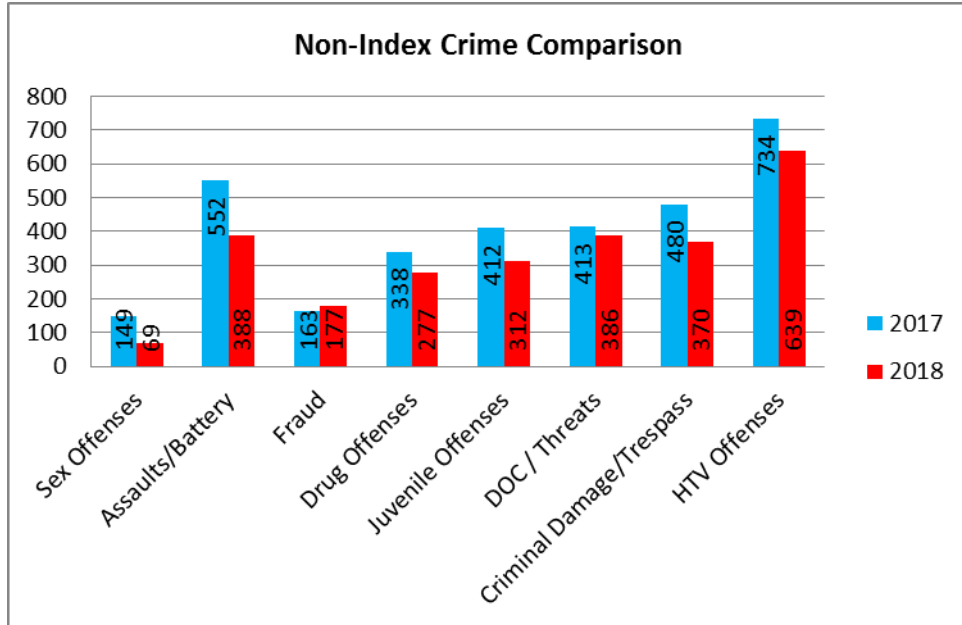

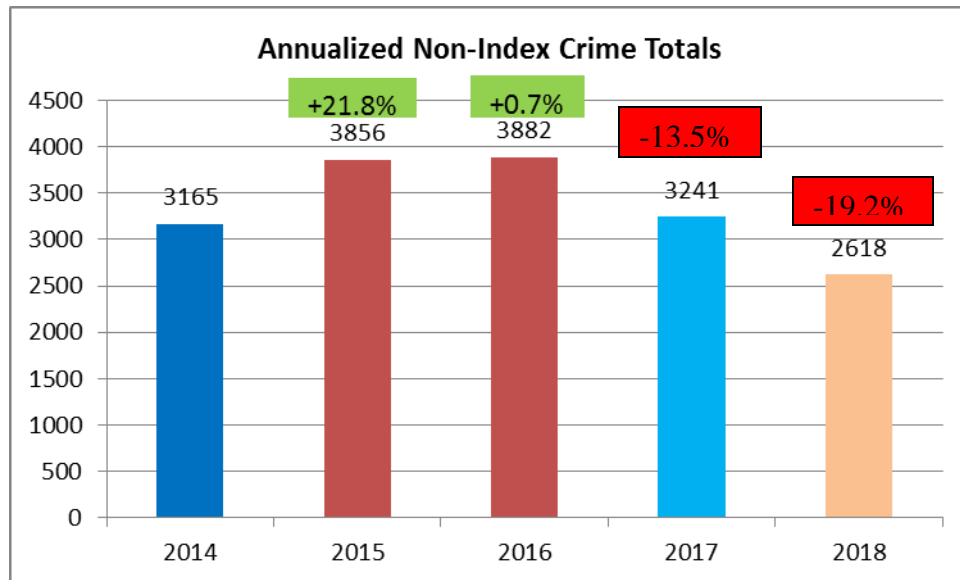

**Index Crimes** - There was a decrease (13.3%) in the total number of Index Crimes from 2018 to 2017. Crimes against persons increased 42.9% from 2017 to 2018. Property crimes declined 17.5% year over year.

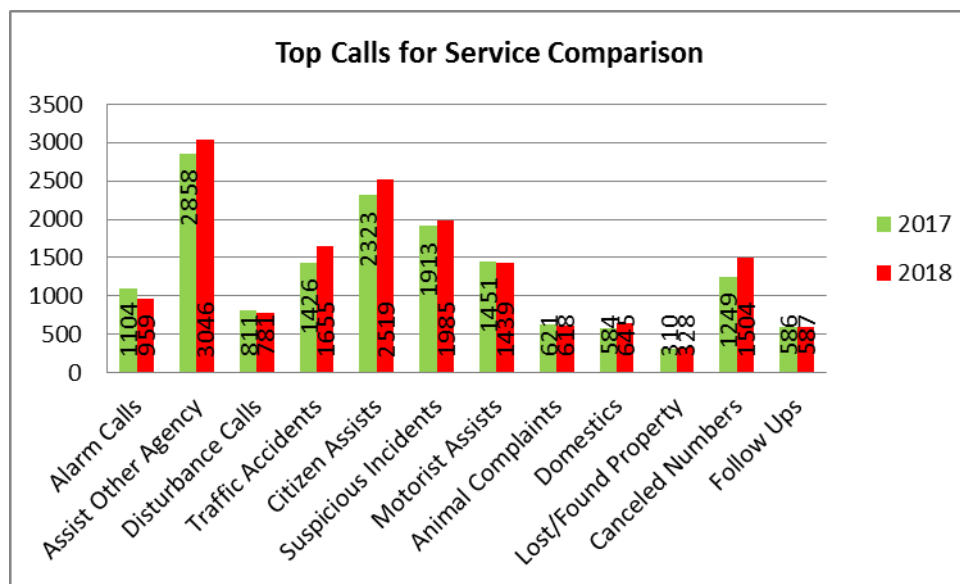

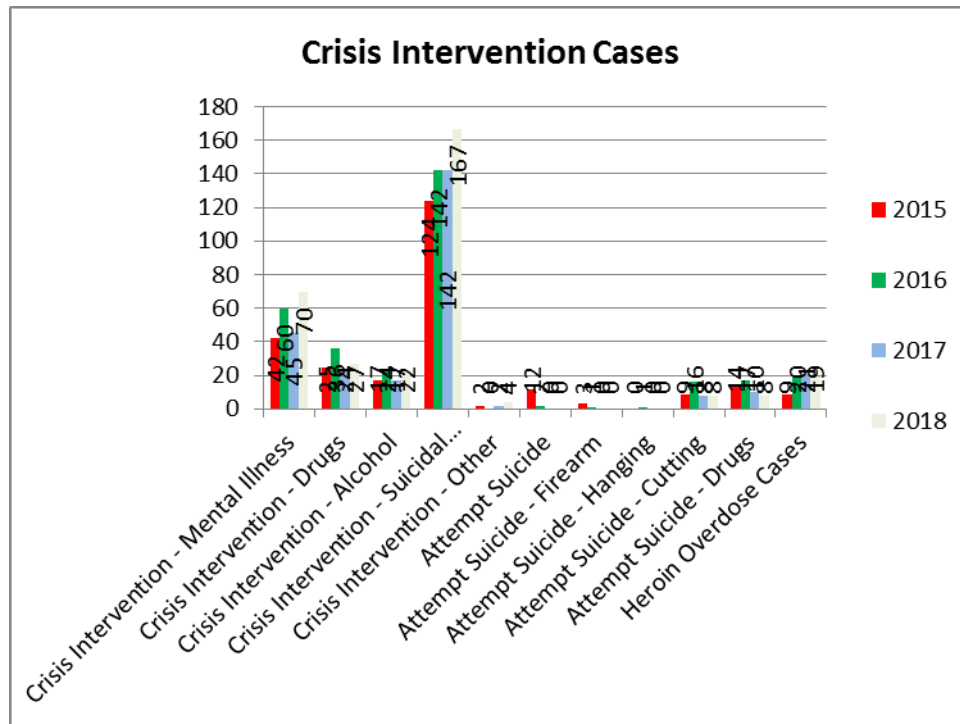

**Non-Index Crimes** - The total Non-Index Crimes decreased by 19.2% from 2017. Every category showed a decrease except Frauds (Identity Thefts and Credit Card Frauds).

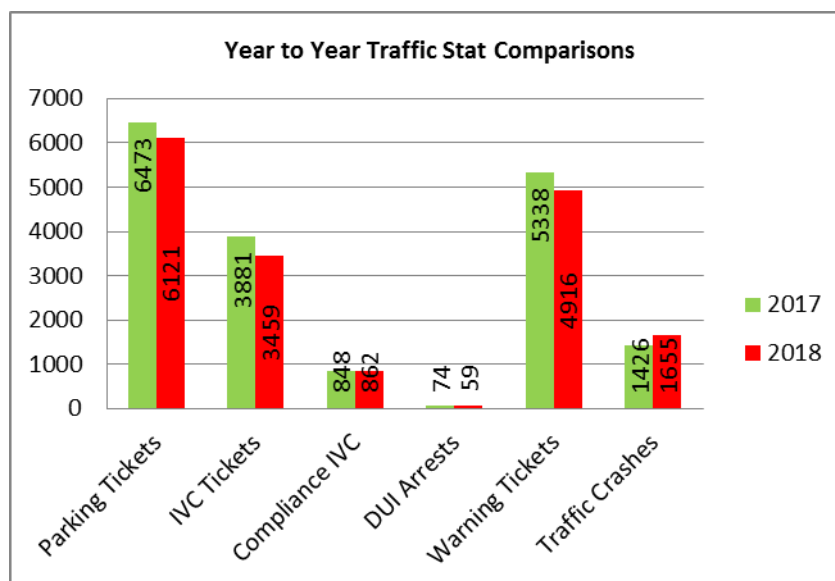

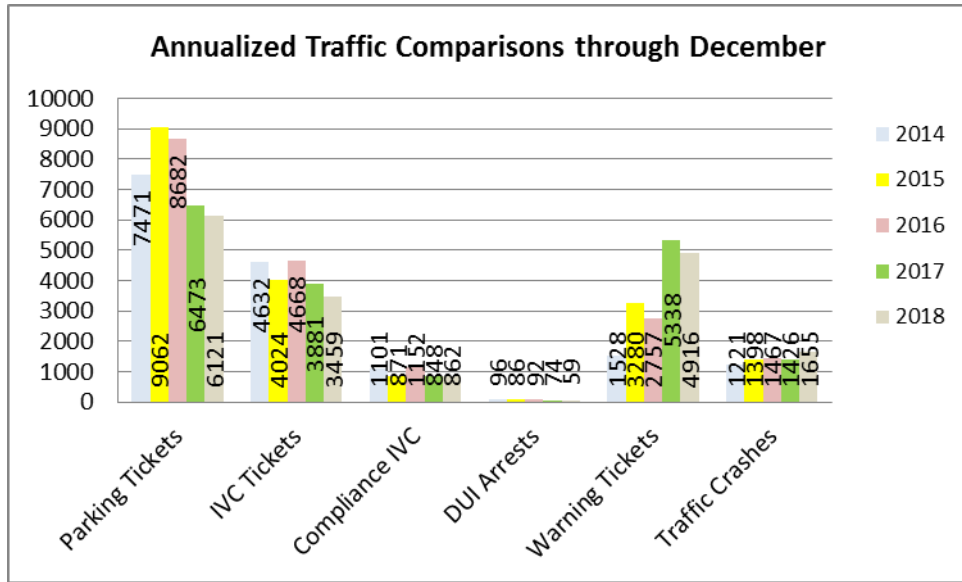

**Top Calls For Service** - The various categories listed in this graph contribute to the majority of the workload for Addison Police officers. Crisis Intervention cases continue to rise as evidenced in the second graph. The biggest increases were Mental Illness and Suicide Threats.

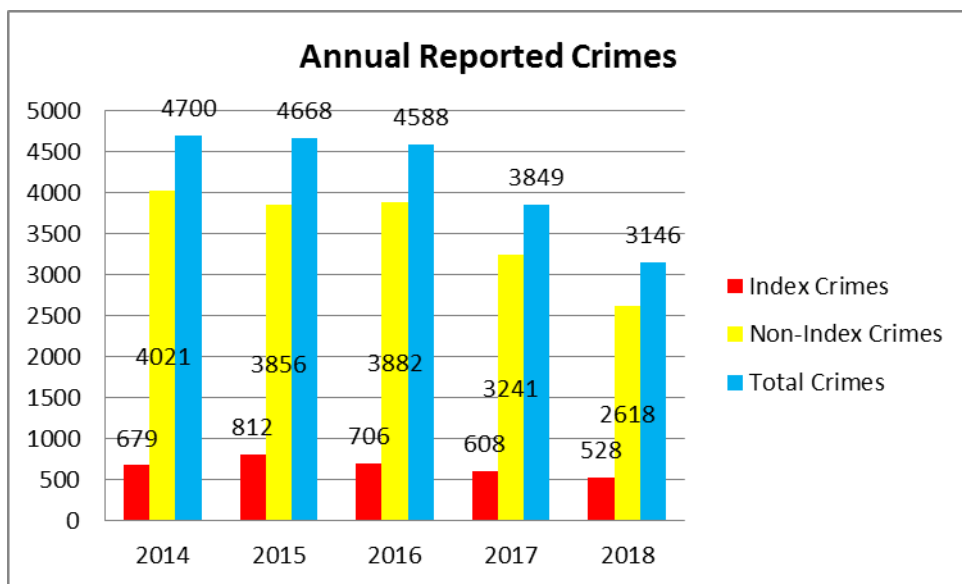

**Annual Traffic Violations** - These graphs show the productivity trends for the past five years in the categories of Traffic Tickets, Parking Tickets, DUI Arrests, Compliance Tickets and Traffic Crashes, as well as a year-to-year comparison. Parking tickets were down 4% year-to-year. Warning Tickets were down 7.9% in 2018 compared to 2017. Traffic tickets and DUI Arrests declined in 2018 from 2017. IVC tickets were down 8.6% year over year, and the number of Traffic Crashes was up 16.1%.

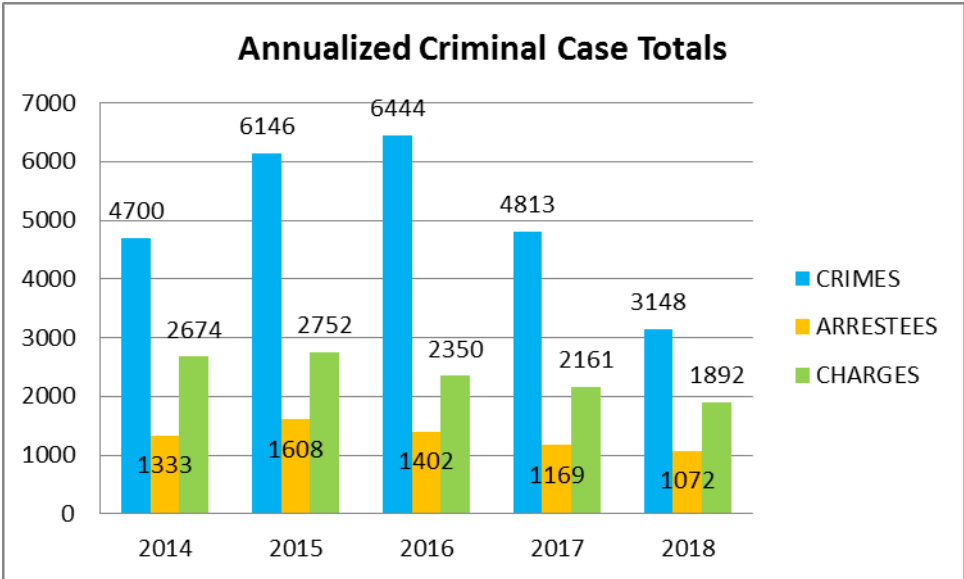

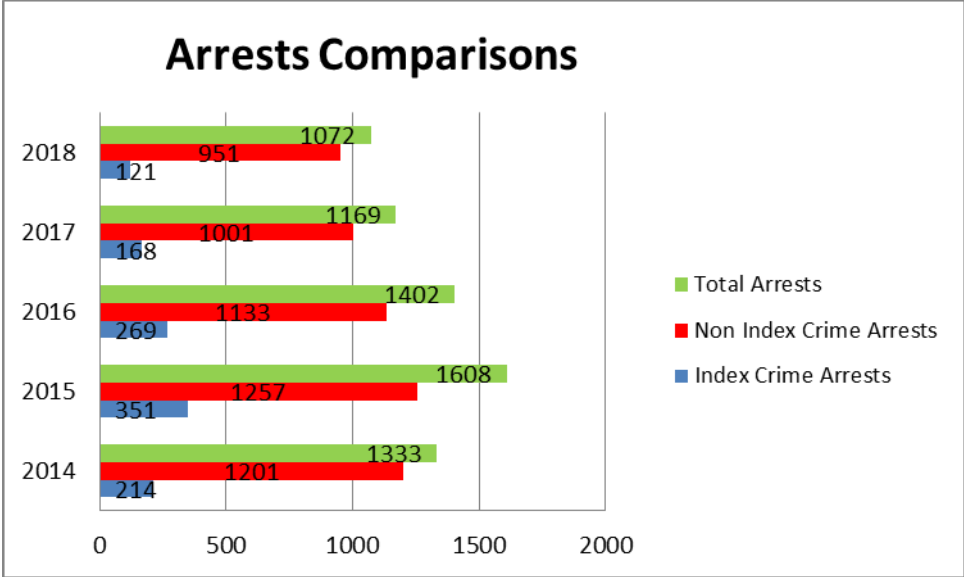

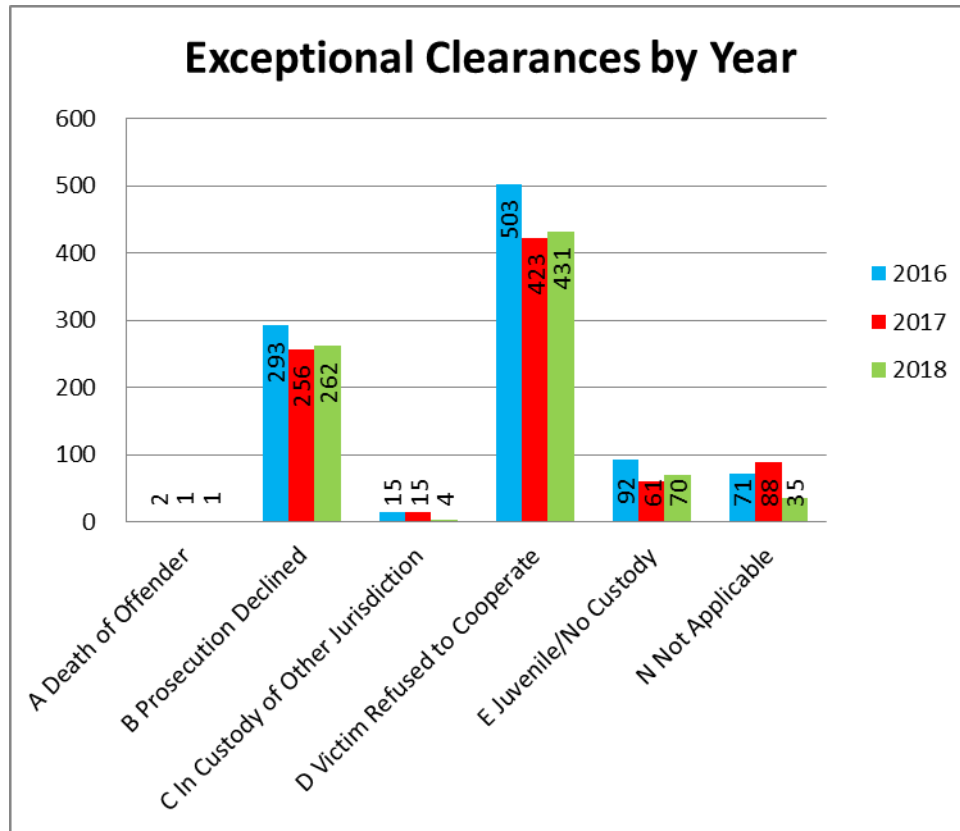

**Yearly Crime Comparison, Yearly Arrest Comparison, and Crime and Arrest Trends** - These four graphs show crime and arrest statistics for the past five years. The total number of reported crimes was down 34.6% in 2018 from 2017. Arrests for both Index Crimes (down 28%) and Non-Index Crimes (down 5%) were down year-to-year in 2018. In addition to the arrest charts, included is an exceptional clearance chart, as many crimes do not include an arrest for varying reasons.

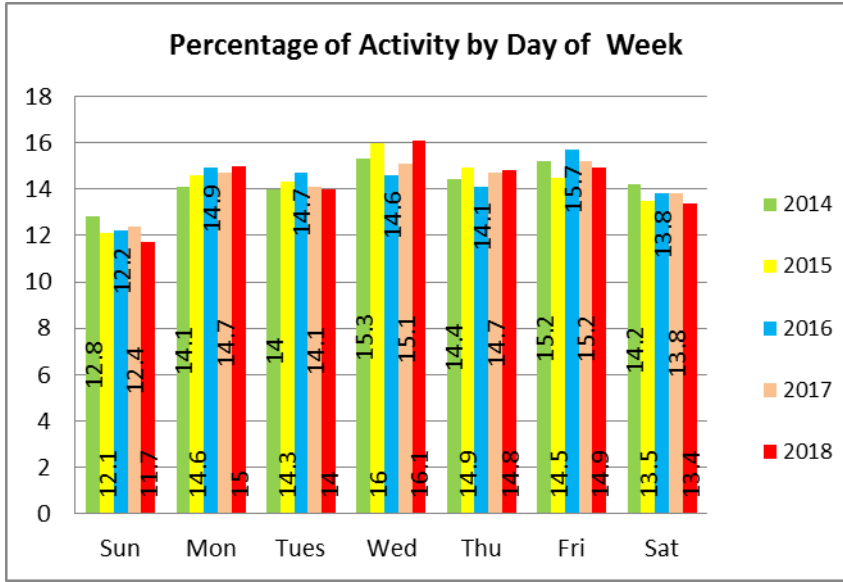

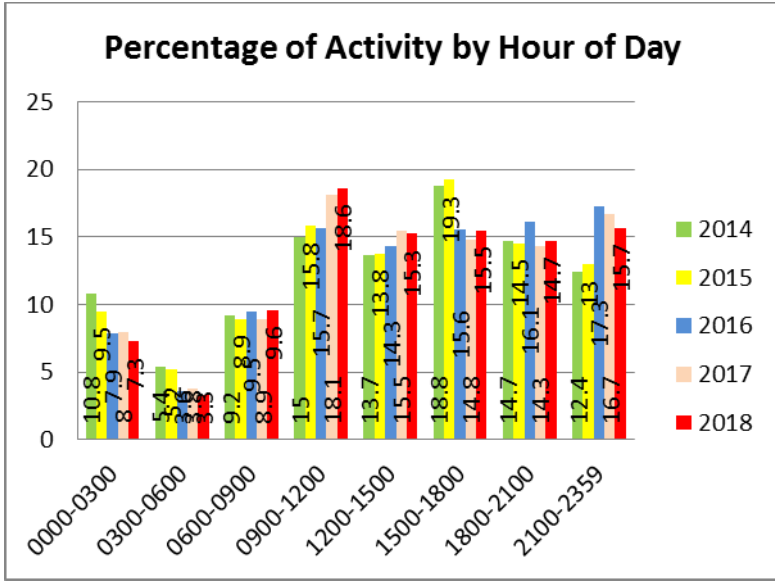

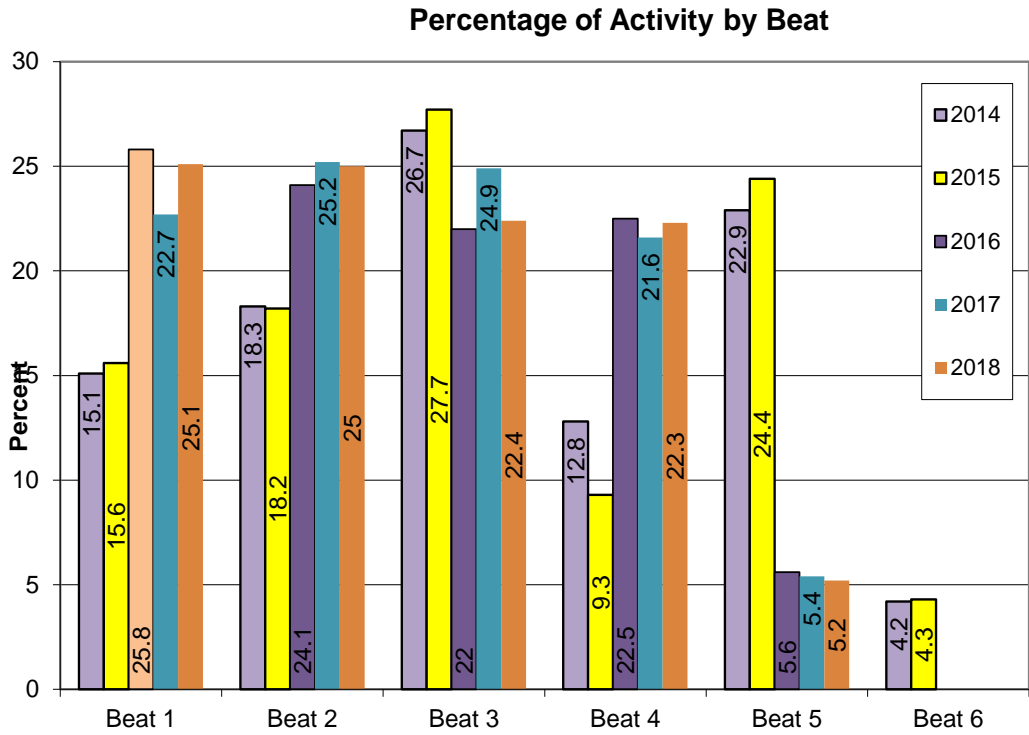

***Percentage of Activity by Hour of Day, Percentage of Activity by Day of Week, and Percentage of Activity by Beat*** - These three graphs show comparison statistics during the previous five years in the percentage of Activity by Hour of Day, by Day of Week, and by Beat. 0900-1200 hours remains the top times of the day for calls for service for the second straight year. Wednesdays now have the highest number of calls for service during the week. Beats 2 and 3 have a slightly higher number of calls for service than Beats 1 and 4. In 2016, the Police Department changed the beat structure. It went to a four (4) beat system with Beat 5 being calls at the Police Department. Prior to 2016, Beat 6 was Police Department calls for service.

**Records Paperwork Volume** – The graph below represents the volume of work processed by the clerks in the Police Department. The decrease is due to the reduced number of arrests and citations in 2018.
